Q4 2023

- Coming soon...

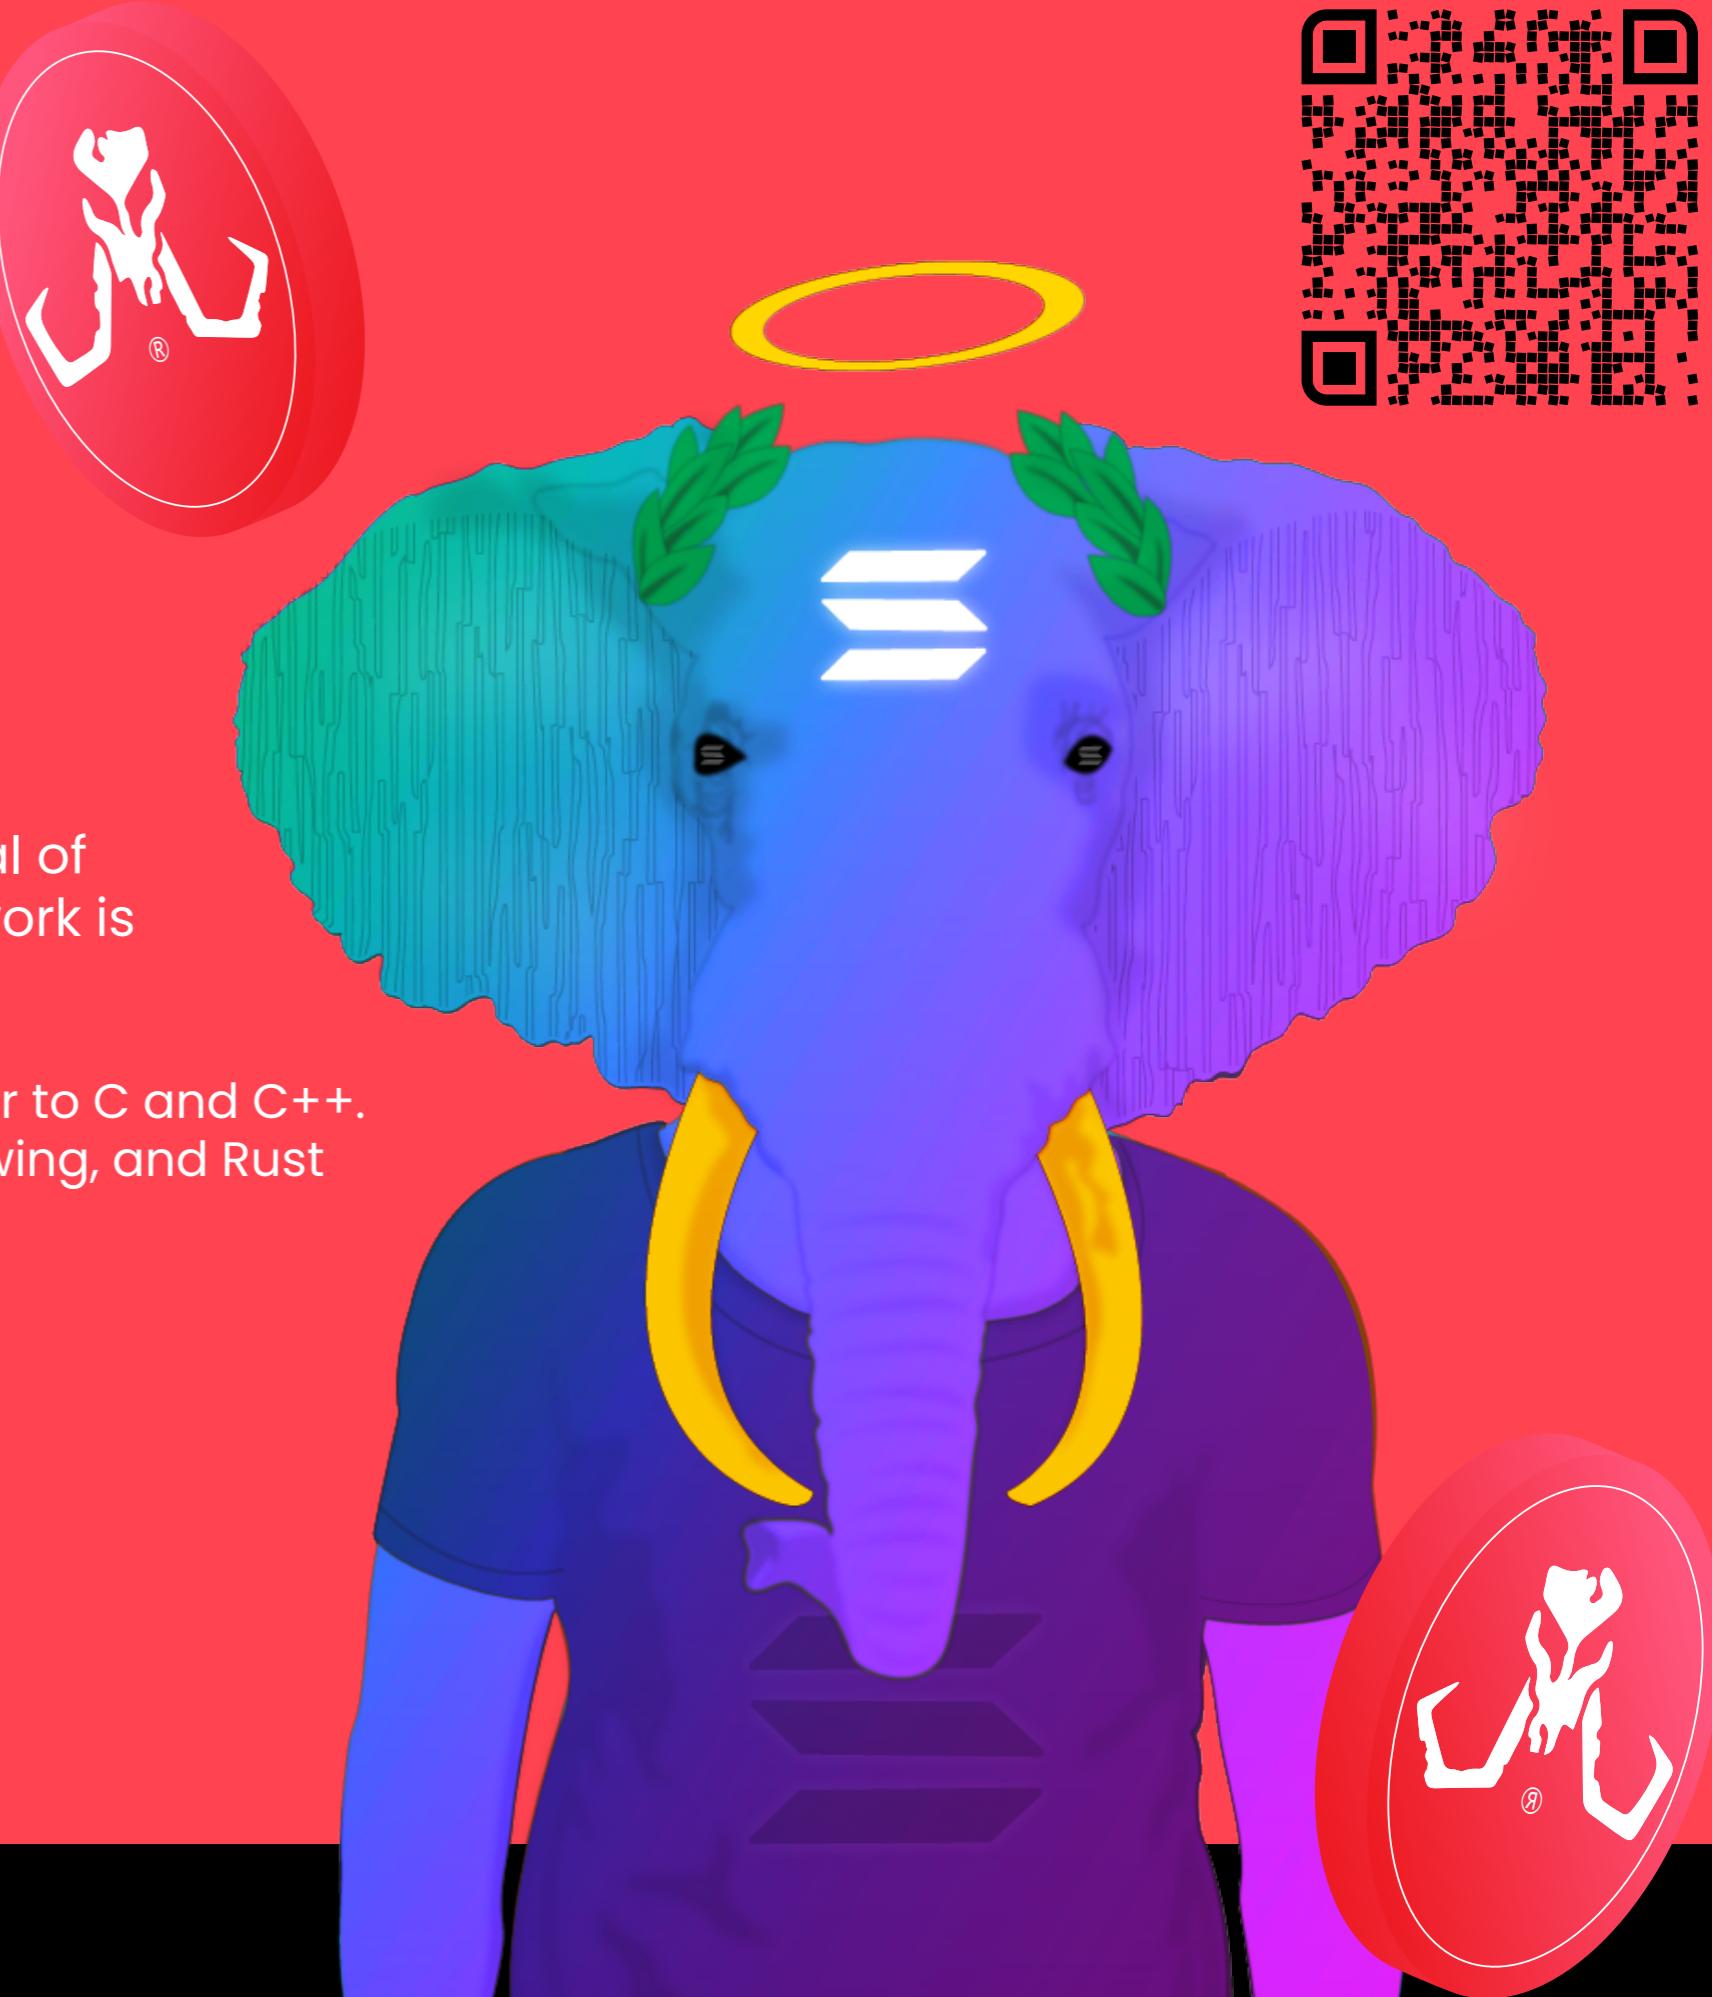

TOKEN ROADMAP

WHY WE CHOSE SOLANA TO LAUNCH MISTER TUSKER TOKEN

- It's fast. It can process over 50,000 transactions per second.
- Fees of less than \$0.01 per transaction enable more usage of your application.
- There's headroom for further performance growth, with the potential of over 1 million transactions per second in the near future as the network is further improved.
- Smart contracts are mainly built in Rust, a memory-safe language similar to C and C++. This might seem daunting at first, but Rust has a huge and growing following, and Rust skills can be transferred to optimize other areas of your application too.

 SOLANA

MISTER TUSKER TOKEN
